

# *Ardisia elliptica*

## SHOEBUTTON ARDISIA

### Myrsinaceae

Common Synonyms: *none*

**FLEPPC Category:** 1

**FDACS Listed Noxious Weed:** Yes

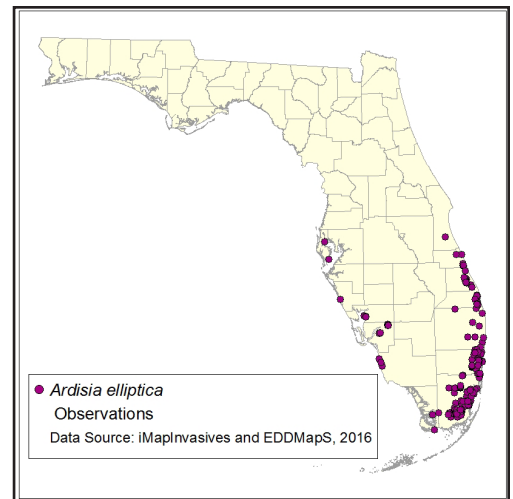

**IFAS Assessment**

North	PROHIBITED
Central	PROHIBITED
South	PROHIBITED

**USDA Hardiness Zone:** 9a-11

**Growth Habit:** Evergreen shrub or small tree

**Origin:** India, China, Southeast Asia

FNAI

**Description:** Evergreen shrub or small tree, to 5 m, glabrous. Leaves alternate, to 20 cm, oblong to oval shaped, entire margins, fleshy, new foliage reddish. Star-shaped flowers in axillary clusters, petals mauve colored. Fruit is a round drupe, red turning black when ripe with white flesh.

**Note:** Similar to the native marlberry (*Ardisia escallonioides*) or myrsine (*Rapanea punctata*) but is larger with conspicuous axillary clusters of mauve flowers.

**Habitat:** coastal berm, maritime hammock, hardwood hammock, mesic flatwoods, strand swamp, cabbage palm hammock, disturbed areas

**Comments:** Prolific reproduction, bird dispersed.

**Florida Introduction Date:** around 1900

**Control Methods:**

Mechanical: Hand pull seedlings

Chemical: Basal bark (10% trichlopyr ester, IFAS), cut stump (50% trichlopyr amine, IFAS), broadcast foliar (per acre in 50 gal solution mix: 96 oz Imazapyr + 6 gal fosamine ammonium + 3 oz metsulfuron methyl +112 oz aquatic label glyphosate, IFAS)
